DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 29, 2008 have been entered. Claims 1-6, 8, 10-11 and 15-20 are pending.

Information Disclosure Statement

2. The IDS dated (04/29/2008) has been considered by the Examiner.

Allowance

3. The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: The most pertinent prior art is Cox (Patent No.: 6,226,396) and Ho et al (Patent No.: 6,983,057). Cox discloses a robust digital watermarking method: the method includes inputting image data with registration signals embedded therein, subjected to geometric transformation, and extracting registration signals from said inputted image data to perform registration processing. Cox teaches registration signal extracting step of extracting registration signals from

said image data. Cox further teaches a frequency property determining step of determining frequency properties of said image data. However Cox does not teach a geometric transforming step of performing inverse transformation of said identified geometric transformation. Ho discloses a method for embedding a watermark including a geometric transforming step of performing inverse transformation of said identified geometric transformation. However, neither Cox nor Ho disclose a geometric transformation identifying step of identifying geometric transformation to which said image data is subjected, using said extracted registration signals and determination results of said determination in the frequency property determining step. Therefore, if watermarked data has undergone some kind of geometric transformation or attack by a perpetrator trying to alter the watermarked data, this method would be able to discern the type of attack and restore the watermark data. The examiner finds no reason or motivation to combine the above references in an obvious rejection thus placing the application in condition for allowance.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
5. Claims 1-6, 8, 10-11 and 15-20, now renumbered as claims 1-15 are allowed.
